DETAILED ACTION

Claim Objections

Claim 19 and dependent claims 20-26 are objected to because of the following informalities: an apparent "copy/paste" error as resulted in lines 4 and 5 being exact duplicates of 2 and 3 resulting in an apparently superfluously repeated limitation. Appropriate correction or clarification is required.

Allowable Subject Matter

Claims 19-26 would be allowable if the objections made above were overcome. The following is a statement of reasons for the indication of allowable subject matter: prior art of record does not describe or suggest an article of manufacture with a machine-accessible medium including data that when accessed by a machine causes the machine to control an image sensor to obtain a scribe pattern on a front side of a wafer placed on a chuck, the front being attached to a tape, recognize the scribe pattern, and control a laser to mark an alignment pattern on a back side of the wafer based on the scribe pattern, the laser being mounted above the chuck.

Notice Regarding Allowable Subject Matter

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

REASONS FOR ALLOWANCE

Claims 37-44 are allowed. The following is an examiner's statement of reasons for allowance: prior art of record does not describe or suggest applicants' invention set forth in claims 37-44, a method comprising controlling an image sensor to obtain a scribe pattern on a front side of a wafer placed on a chuck, the front side being attached to a tape, recognizing the scribe pattern, and controlling a laser to mark an alignment pattern on a back side of the wafer based on the scribe pattern, the laser being mounted above the chuck.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cade (U.S. Patent No. 4,534,804) teaches a laser process for forming identically positioned alignment marks on opposite sides of a wafer (abstract and title).

Conclusion

This application is in condition for allowance except for the formal matters discussed for claims 19-26 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

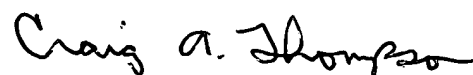

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
